# JUICY JUICE

The incandescent glow of citron — a tangy, almost fluorescent hue — is electric.

“Zesty” seems all too perfect to define this powerful punch. Its sun-drenched vibrancy has hints of subtle green undertones – not enough to push it into lime or even chartreuse territory but just enough to make it an almost cool yellow. Fiery and ebullient, it bursts forth with dynamic energy and optimism that is infectious and infatuating. It’s chic and cool with greys and black, famously fresh with caramels and creams or perhaps a splash of aquamarine, and alluringly stately with jewel-toned emeralds and teals. Citron always makes for a bold and buoyant pairing.

— Christina Spratt Spencer
